

## Federal Highway Administration

### Discrimination in contracting with the Federal Highway Administration:

African American and Hispanic American contractors have been cut out of government contracting with the Federal Highway Administration to the tune of 2.7% participation. African Americans represent over 13% of the American population and Hispanic Americans represent over 14%. 28% of the total United States population is only receiving 2.7% of government contracts issued by the Federal Highway Administration. This is an outrage that will not go unnoticed any longer!

**Below are State by State breakdowns of FHWA contracts as well as the amount and percentage of African American and Hispanic Participation. (Click on each link to view the numbers)**
